

Mylar Seal Kits

These gap seal kits from HansJorg Streifeneder include the seals, tape and instructions to seal all control surfaces (wings, rudder, elevator) on the glider.

I do not stock any Mylar or tape because of the limited shelf life for these products. These kits are **by pre-order only** because of this and the specific requirements for each glider. If you do not need the entire kit, I can get specific lengths of Mylar and rolls of tape. Use the contact form in the menu to contact me for a quote.

The prices below are in **Euro** and do not include shipping from Germany to me and then from me to you.

Standard Mylar is the pre-curved Mylar - Combi Tape has the zig-zag turbulator cut into the leading edge of the Mylar.

Alexander Schleicher
