Becker produces both Mode C and Mode S (57 mm) transponders in either a single block unit, or a remote transmitter with a control unit mounted in the instrument panel. An altitude encoder is also required for these units.

Both the Mode C or Mode S transponders may be purchased with a 250 W or 150 W output. For gliders, the lower 150 W option is preferred for lower battery drain.

ATC-4401 Mode C or BXP-6401 Mode S

Remote Unit for 4401 Mode C or 6402 Mode S

Control Unit CU5401 Mode C or 6401 Mode S
