

The LX 8080 uses the same technology as the LX 9000, but is in a smaller package. The LX 8080 is designed to be installed in one standard 80 mm and one 57 mm panel cut-out and is an easy swap for an older Cambridge, LX 5000 or Ilec SN10.

**Price: 2790 €**

- internal powerflarm module: **690 €**
- ADS-B in module: **490 €**
  
- rear seat repeater: **1490 €**
- LX8080 Backup: **2090 €**

The V8 vario now comes as standard, but a V9 can be substituted at no charge. It is also possible to upgrade the V8 to the 80mm V80 for 190 €. This gives significantly more screen space to display data and uses two 80 mm holes.

**LX 8080 Club Price: 1990 €**

**LX 8080 Club D - rear seat repeater Price: 950 €**

Uses the same software as the LX 8000 and V9 vario, but with the following software limitations:

- no terrain, no map elements (water bodies, road, cities).
- the profile may not be modified using LX-styler.
- no voice module

The Club software can be upgraded to the full version with the purchase of a firmware upgrade.

Individual upgrades such as **terrain** or **map elements** can be purchased for **190 €**.

**Upgrade** the V9 **to a V8** for Club version for **180 €**.
